**Course duration:** 3 credits, 15 weeks (45 class hours)

**Course pre-requisites:**

**Course Objectives:**

This course aims to basic principles of databases, design and development databases as part of an entire information system, proficiency in basic database development. This course includes SQL databases foundation, also Database Management Systems are covered. As a chosen DMBS – PostgreSQL Server will be highlighted. As additional part of this course, integration of databases with backend web-application will be implemented.

**Course Goals:**

After the completion of the course, students will learn how to do the following:

- Develop SQL databases as part of an entire information system.
- Design normalized database structures
- Create and manage databases.
- Create stored procedures and triggers.
- Create SQL transactions

**Literature:****Required:**

1. DATABASE SYSTEM CONCEPTS, SEVENTH EDITION, Silberschatz Abraham, Korth, Henry F., Sudarshan, S., 1344 pages, 2020

**Supplementary:**

1. <https://www.postgresql.org/docs/current/tutorial.html>

#### Academic Policy

KBTU standard academic policy is used.

- Cheating, duplication, falsification of data, plagiarism, and crib are not permitted under any circumstances!

- Attendance is mandatory.

**Attention.** Missing 30% attendance to lessons, student will be taken from discipline with filling in F (Fail) grade.

Attendance is conducted online in the platform [wsp.kbtu.kz](http://wsp.kbtu.kz) and starts at the beginning of the first lesson.

If a student noted that he/she is present, but will be absent when checking the attendance, this student receives -3 points.

Students must participate fully in every class. While attendance is crucial, merely being in class does not constitute “participation”. Participation means reading the assigned materials, coming to class prepared to ask questions and engage in discussion.

- Students are expected to take an active role in learning.
- Written assignments (independent work) must be typewritten or written legibly and be handed in time specified. Late papers are not accepted!
- Students must arrive to class on time.
- Students are to take responsibility for making up any work missed.
- Make up tests in case of absence will not normally be allowed.
- Mobile phones must always be switched off in class.
- Students should always be appropriately dressed (in a formal/semi-formal style).
- Students should always show tolerance, consideration and mutual support towards other students.
